EXPERIENCE

• Karya Sync

Frontend Developer Intern

Jun 2026 – Present

- Engineered and integrated **20+ REST APIs** into a React.js and TypeScript admin dashboard, building reusable components, API-driven workflows, form handling, and responsive UI for multiple administrative features.
- Architected an end-to-end **Site Issue Management** feature across React Native, ASP.NET, and PostgreSQL, including database schema design, issue validation, GET/POST/PUT APIs, predefined/custom issue selection, and approve/cancel status workflows.
- Implemented frontend **Role-Based Access Control (RBAC)** using React and TypeScript, managing user roles through localStorage and applying role-based permissions across protected routes, navigation, and dashboard features.
- Delivered interactive **dashboard analytics and data visualizations** using API-driven data and chart components, while using Redux for centralized state management of reusable application data and global UI states such as toast notifications.
- Designed and styled reusable **React Native components** for cross-platform mobile workflows, integrating REST APIs and handling loading, success, error, and dynamic data states for consistent Android and iOS experiences.

PROJECTS

• FilmAI — AI Movie Discovery Platform (React.js, Redux, TMDB API, Groq LLM) [Live Link](#) [GitHub](#):

- Engineered an AI-powered movie discovery platform using React.js, Redux, TMDB API, and Groq LLM, enabling natural-language movie search and personalized recommendations.
- Crafted a responsive, component-based UI using React.js and Tailwind CSS with movie trailers, cast details, similar movies, and dynamic movie detail modals.
- Implemented centralized state management with Redux for movie data, search results, and UI states across multiple pages and interactive components.
- Optimized API data fetching using parallel requests, lazy loading, and shimmer placeholders to improve perceived performance and user experience.

• MyTube — Video Streaming Platform (React.js, Redux, Firebase, JavaScript, Tailwind CSS) [Live Link](#) [GitHub](#):

- Architected a responsive video streaming platform using React.js and Redux with categorized content, video browsing, search, subscriptions, watch history, and liked videos.
- Streamlined search with a 500ms debounce using React hooks and Redux, reducing redundant API requests by ~80% during rapid search interactions.
- Constructed a live-chat experience using API polling with auto-scrolling messages, user-generated chat, Firebase authentication, and capped message storage for efficient client-side memory usage.
- Established n-level nested comment threads, dark/light mode, dynamic routing, and reusable React components for scalable UI development.

• Swaad Express — Food Ordering Platform (React.js, Redux, JavaScript, Tailwind CSS) [Live Link](#) [GitHub](#):

- Created a responsive food-ordering and restaurant discovery platform using React.js, Redux, and Tailwind CSS, enabling users to browse restaurants, explore menus, and manage orders.
- Assembled reusable React components with Redux-based state management and dynamic routing to handle restaurant listings, menus, and user interactions.
- Configured mobile-first responsive layouts using Tailwind CSS, ensuring consistent usability across mobile, tablet, and desktop devices.
- Structured reusable UI components and optimized state-driven rendering to maintain a scalable frontend architecture across multiple pages.

SKILLS

- Frontend:** React.js, React Native, JavaScript (ES6+), TypeScript, Redux, React Router, Tailwind CSS, SCSS, HTML5, CSS3, Responsive Web Design
- Backend & Database:** ASP.NET, C#, REST APIs, PostgreSQL, API Integration, Database Design
- Tools & Platforms:** Git, GitHub, Firebase, Figma, Netlify, Postman

EDUCATION

• Bhai Parmanand DSEU Shakarpur Campus - 2

Bachelor of Computer Applications (BCA) — CGPA: 8.5

New Delhi, India

2023 – 2026

CERTIFICATIONS

- Full Stack Developer Bootcamp — GeeksforGeeks:** MERN Stack, React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, and Full-Stack Development.
- Responsive Web Design — freeCodeCamp:** HTML5, CSS3, Responsive Design, Flexbox, CSS Grid, Accessibility, and Mobile-First Design.
